

# Squall

**Squall® reduces the spray drift, improves the deposition on plants and the spray's rain fastness. Add Squall to the tank mix for a better efficacy of your crop protection.**

## Product information

- Squall improves the performance of herbicides, fungicides and insecticides as well fertilizers. Not compatible with MaisTer® en Atlantis® OD.

## Directions for use

- **Dosage: Use 0.5 litre per 100 litres of spray liquid (0.5%)**
- **Squall should be added slowly to the tank mix as the last component after all ingredients have been dissolved, stirring continuously.**
- Squall can be sprayed with standard and drift reducing nozzles
- Using a premix greatly reduces the chance of issues

## Storage and Safety precautions

- Squall is 100% biodegradable and environmentally friendly
- Store Squall with the other crop protection products in a dedicated, cool storage at a minimum temperature of +2°C. Avoid prolonged exposure to sunlight.
- Use the normal protection recommended for spraying to protect the skin and face.
- The container is not for re-use.
